OUR FOOD WASTE DISPOSERS
AND INSTANT HOT WATER TAPS
MAKE LIFE SIMPLE

in **sink**erator

MAKE LIFE SIMPLE WITH INSINKERATOR

It's nearly 100 years since InSinkErator invented the world's first food waste disposer and our products have been helping to make life easier for millions of busy households ever since.

Incredibly proud of our US heritage, we've made it our mission to constantly innovate – never standing still from the very beginning of our business. Which is why today, we remain the global leader in food waste disposers.

FOOD WASTE DISPOSERS

When composting isn't practical, a food waste disposer is a great option for tackling inedible and messy food waste from food preparation and leftovers – quickly, conveniently and safely – greatly improving the cleanliness of your kitchen.

INSTANT HOT WATER TAPS

Eliminating the need for a kettle, the collection includes our impressive award-winning* 4N1 Touch tap, which instantly and safely dispenses filtered steaming hot water, filtered cold water plus regular hot and cold water.

ABOUT OUR
FOOD WASTE
DISPOSERS

S THIS EASY

WITH A FOOD WASTE DISPOSER

Say goodbye to food scraps from food preparation and messy leftovers with an InSinkErator food waste disposer.

A convenient and safe way to manage food waste practically and improve hygiene in the home, food waste disposers are easy to install underneath the kitchen sink, connected to the standard plumbing.

Designed to fit most standard 90mm sink wastes, a food waste disposer can be added to a new kitchen or easily retrofitted into an existing one.

SAFE AND SIMPLE TO USE

There are no blades inside our food waste disposers, for easy and safe operation.

So, whatever's cooking, now all you need to do is chop, grind and chill!

MANAGING FOOD WASTE

CLEANLY AND CONVENIENTLY

Easy to use, simply place peelings and leftovers into the sink, run the tap, press the button and push the food waste into the plughole.

Conveniently, disposers never need emptying, as the food waste is ground into small particles that pass through your standard sink plumbing.

I was recommended an InSinkErator by my brother and it's the best purchase for my new kitchen.

I don't understand why every house doesn't have one... there are no smelly bins from food waste.

I would highly recommend this. 

Nicola, 2023

FIND OUT MORE
ABOUT OUR HOW
OUR FOOD WASTE
DISPOSERS WORK

GOOD THINGS

**COME FROM FOOD
WASTE DISPOSERS**

*Food waste is ground into
small particles by your
InSinkErator disposer*

*The particles are then flushed
through your plumbing*

WHAT MAKES A FOOD WASTE DISPOSER A MUST-HAVE APPLIANCE FOR THE HOME?

Despite how hard you try to eliminate food waste, preparing meals inevitably always generates some peelings, scraps and leftovers. If this waste ends up in landfill, it will contribute to the release of harmful methane gas into the environment.

However, if placed in a food waste disposer, waste will be ground into fine particles that pass through the sewers to your nearest waste water treatment plant.

Here, they can yield valuable biogas and other vital soil nutrients which can be used as fertiliser.

A DISPOSER

FOR EVERY HOME

POWER SERIES

Grinds food finer

Additional grind capabilities and horsepower to take on tough food scraps.

Best for:

Larger families, older homes and those who use their food waste disposer every day during meal prep and clean up.

ADVANCED SERIES

Quietest

Unmatched performance. SoundSeal Technology and MultiGrind Technology deliver the best possible grind with the least amount of noise.

Best for:

Open-plan kitchens, frequent entertainers and those who simply want the best for their home.

POWER SERIES

Power Grind

For tough food scraps like peach pits.

MultiGrind Technology

S THIS EASY

WITH OUR INSTANT HOT WATER TAPS

From making drinks to preparing meals, our instant time-saving hot water taps can help to simplify and streamline all kinds of kitchen tasks.

SAFE, FAMILY-FRIENDLY DESIGN

Not only can our taps help to ensure a smooth-running kitchen, but they're also designed with a locking safety lever, providing you with peace of mind that everyone in your household can use them. For simplicity and safety, insist on an InSinkErator instant hot water tap.

MADE FROM BRASS TO LAST

Our instant hot water taps not only look great, but are manufactured from durable brass – a high-quality, anti-corrosive material that's designed to last.

PERFECTLY HOT, EVERY TIME

- Both our filters and the innovative space-saving 2.5L NeoTank are designed to maximise the efficiency and longevity of our hot water taps and fit neatly into cupboards
- Easy thermostatic touchscreen controls allow you to set the in-tank water temperature between 88-99°C – perfect for hot drinks

*206mm deep

WHICH TAP IS YOUR TYPE?

4N1 TOUCH TAP

Replaces your existing tap and gives you:

- Filtered steaming hot
- Regular hot & cold
- Filtered ambient cold
- ❄ Filtered chilled (with optional NeoChiller)

Offering a range of different features and benefits, InSinkErator has a great choice of stylish, high performing taps designed to deliver water in all kinds of ways to suit your kitchen and family needs.

Great tap at a fraction of the cost of the two leading companies.

Tap functions as it should, delivering steaming hot water at the pull of a lever. Safety device works very well too.

Would recommend. //

- Regular hot & cold

 DESIGNED & MADE IN ITALY

HOT & COLD SIDE TAPS

Dedicated side taps that dispense:

- Filtered steaming hot
- Filtered ambient cold

HOT-ONLY SIDE TAP

Dedicated side tap that dispenses:

- Filtered steaming hot

STYLE, SIMPLICITY, SAFETY

As well as being a stunning and stylish addition to your kitchen, our instant hot water taps are designed to save time, simplify tasks and be safe enough for all the family to use.

SO HOW DO WE DO THIS?

InSinkErator taps are protected by a locking safety lever that must be first pushed down and then pulled towards the user to start the water flowing.

The moment the lever is released, the water stops immediately, thanks to a spring-back feature – so there's no chance of steaming hot water running unattended. In addition, spouts on all our 3N1 and 4N1 Touch taps are fully insulated, making them safe to touch, even when steaming hot water is flowing through.

WRAS APPROVED DESIGNS

For further peace of mind, it's good to know that our 3N1 and 4N1 Touch instant hot water systems (tap, tank and filter) are approved by The Water Regulations Advisory Scheme (WRAS), which demonstrates InSinkErator's commitment to compliance and safety. WRAS is important because it helps protect public health and ensures the quality of water products in the UK.

FOR WATER EVERY
WAY, CHOOSE OUR
GOOD HOUSEKEEPING
INSTITUTE APPROVED

4N1 TAPS

Accessing hot water is simple – just press and hold the lever to dispense – and a safety spring lock makes it difficult for children to operate. The lack of a continuous flow adds an extra element of safety too – as soon as you release the lever, the flow is immediately shut off, so hot water never runs unattended.

**Good Housekeeping Institute
Approved 2024**

FIND OUT MORE
ABOUT OUR 4N1
INSTANT HOT
WATER TAPS

DESIGNED & MADE IN ITALY

Offering exceptional functionality at an affordable price, our 4N1 tap has been recognised by The Good Housekeeping Institute as the 'Best Value Hot Water Tap & Best for Filtered Cold Water'.

- Effortlessly dispenses filtered steaming hot water with a smooth laminar flow of up to 99°C*
- Touch button technology delivers filtered ambient water
- No need to buy bottled water, saving money and reducing plastic waste
- Locking lever and fully insulated spout for extra safe operation
- Supplied with space-saving tank and filter

HOW COOL...

Want to have your cold water refreshingly chilled and filtered? Then choose the **InSinkErator NeoChiller**, which sits under the sink, alongside your NeoTank.

*In-tank temperature

PERFECTION

ON TAP

Stunning contemporary design in a flawless on-trend finish – our Brushed Copper* 4N1 and 3N1 instant hot water taps make the most beautiful addition to any kitchen.

COMPLETE THE LOOK

To add an extra stylish element, choose a matching Brushed Copper soap dispenser.

The perfectly co-ordinated partner to your elegant new tap, the dispenser helps to promote regular hand washing, ensuring high hygiene standards at all times.

Keeping clean never looked so good!

*Available in 4N1 J and L shape and 3N1 J and L shape

TANKS FILTERS AND CHILLERS

At the heart of our instant hot water taps' functionality, are the InSinkErator NeoTank and water filter.

Replacing your filter every six months will ensure optimum performance of your InSinkErator hot water tank by reducing the limescale and calcium build-up inside your hot water system. The filter also improves the taste of water by significantly reducing chlorine and other impurities in your tap water*.

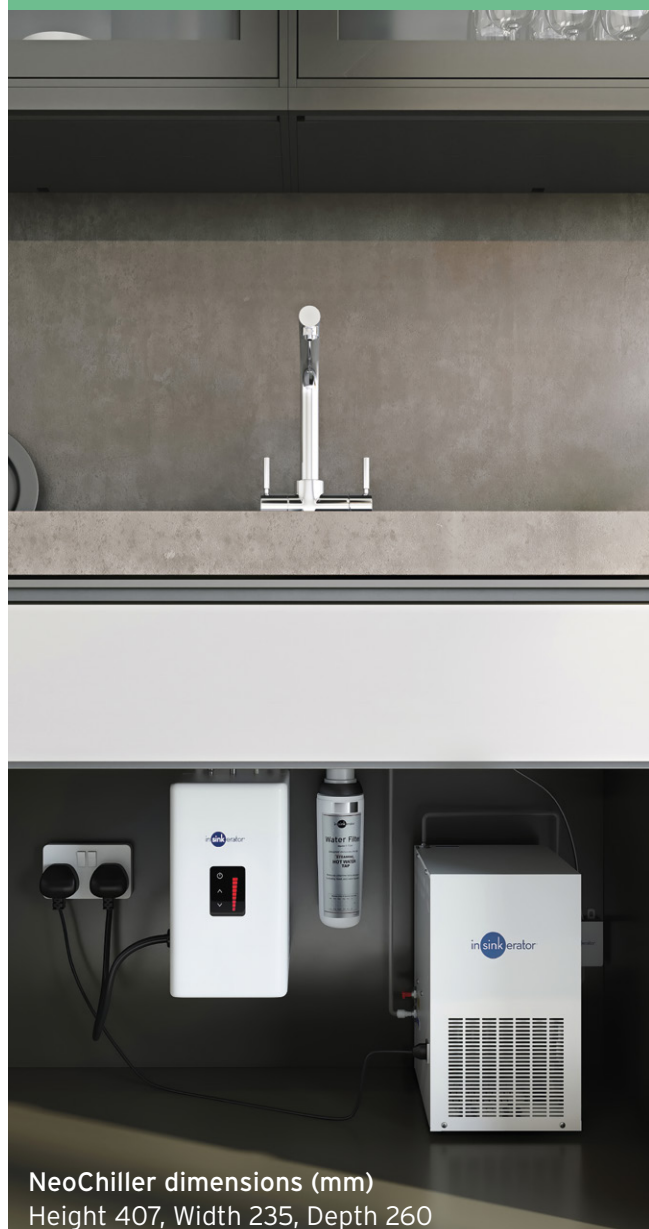

*Very hard water areas may require more frequent filter replacement

HOT DRINKS, HOW YOU LIKE THEM

Designed to deliver hot water on demand, the innovative 2.5L NeoTank features a digital touch screen thermostat control, that lets you set the in-tank temperature between 88°C and 99°C – just right for making tea, coffee and all your favourite hot drinks.

NeoTank dimensions (mm)
Height 310, Width 157, Depth 206

NeoChiller dimensions (mm)
Height 407, Width 235, Depth 260

NEOCHILLER

The high performance NeoChiller is compatible with our 4N1 and HC1100 taps. It delivers perfectly chilled filtered water at a rate of up to 7L per hour at between 3°C and 10°C.
