[1] At a range of energy efficiency classes from A+++ to D

[2] Energy consumption kWh per year, based on 160 drying cycles of the standard cotton programme at full and partial load, and the consumption of the low power modes

[3] Programme time of the standard cotton programme at full load

[4] On a condensation efficiency class scale from A to G

[5] Weighted condensation efficiency for the standard cotton programme at full and partial load

*Comparison of the runtime of cotton cupboard dry with and without varioSpeed Plus option activated, measured according to IEC 61121:2012. Activating the varioSpeed Plus option may result in increased energy consumption.

**Comparison of the temperature recommendation for gentle drying according to the international standard for textile care labeling ISO 3758:2023 and the drying temperature (°C) in eco program with full load (according to EU 2023/2533)
